

INTRODUCING THE WORLD'S MOST SOCIAL DISHWASHER.

Fine food. Wonderful wines. Great company. Few things compare to the luxury of outdoor entertaining. The missing ingredient? An outdoor dishwasher designed for stylish outdoor living.

Introducing the ASKO Alfresco Dishwasher™ – the first dishwasher specifically designed for outdoor use. Australians can now dine, load dishes and continue entertaining guests without so much as a break in the conversation. No more running back inside with piles of plates and missing out on special moments.

With its smart, user friendly features, the ASKO Alfresco Dishwasher™ can handle just about anything the serious outdoor entertainer can throw at it.

Incorporating high-end Scandinavian design and quality that ASKO is famous for, the ASKO Alfresco Dishwasher™ features stainless steel top, sides and back for added environmental protection. All steel parts come with advanced corrosion protection while sealed electronics keep out the harsh Australian elements.

The ASKO Alfresco Dishwasher™ has been designed to make outdoor entertaining more convenient, giving you added time to socialise. With exclusive Alfresco programming, you can rest assured your precious glassware and serving platters will be cleaned to perfection. And at a whisper quiet 48dB(A), you can enjoy a glass of wine after dinner without being disrupted by noisy cleaning.

With a capacity for 14 place settings, flexible basket system for large plates, platters and serving bowls plus a 4 star WELS water efficiency rating, it is the perfect addition to the ultimate outdoor kitchen.

The ASKO Alfresco Dishwasher™ hits selected Australian retailers in late March with pre-orders available exclusively from asko.com.au/outdoor-dishwasher

The ASKO story

ASKO's kitchen and laundry appliances have helped people cook, clean and care for their families and environment for more than 60 years. Built to last with an intelligent focus on contemporary Scandinavian design and quality, all ASKO products are environmentally friendly.
